

# How to Write Homework

staple

Your Name \_\_\_\_\_

Lesson Number (not the page number) \_\_\_\_\_

1. Write the answer legibly.

2.  $3x - 5 = 10$   
     $+5 \quad +5$   
     $3x = 15$   
     $x = 5$

Work DOWN the page, not across

The answer goes at the bottom.

3. Next problem

4. etc.

Leave a blank line between each answer.

Start the assignment on the front side of the paper.  
It's okay to write on the back of the page.

Work problems down the page ↓, not across →.

Two columns per page, max.

For equations, box your final answer.

For definitions, write the word you are defining FIRST.

Handwriting must be at least  $\frac{3}{16}$  inch (5 mm) tall and legible.

If you are using a spiral, tear off all the "fringe".

Staple your pages together in the top left corner.
