

Lesson 2

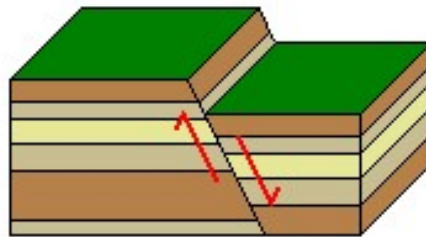

Faults

Use your handout from class and read pp. 424 – 425 in the book to answer the questions.

1. Label the type of fault: normal fault, reverse fault, graben, horst.

2. Label the hanging wall and the foot wall on the diagram below:

3. What kind of fault is the large San Andreas fault in California?
4. Faulting plays an important role in the _____ - _____ mountain.
5. Name one example of the type of mountain in question 3.
6. What is the highest peak in the mountain range in question 4?

+5 points Bonus: Use Playdoh, clay, or other material to make a model of several faults. Label the faults and bring it to class on Thursday.
